PROFESSIONAL SUMMARY

B.Tech Computer Science student (2027) with Full Stack Engineering internship experience at Coding Arena, building REST APIs and backend features using Django, Django REST Framework, and PostgreSQL. Experienced with React.js, SQL, AWS services, and GenAI integrations across full-stack applications.

EDUCATION

Sagar Institute of Research and Technology, Bhopal *Expected 2027*

Bachelor of Technology in Computer Science — CGPA: 8.38 / 10

EXPERIENCE

Full Stack Engineer Intern | Coding Arena *Apr 2026 – Jul 2026*

- Contributed to Orbin, an event management and certificate automation platform with **~40 REST API endpoints**, implementing **JWT authentication, RBAC**, event registration, QR-based check-ins, certificate verification, and bulk Excel/CSV processing of **1,000+ records** per upload; tested workflows across **50+ events** using Django REST Framework.
- Contributed to DermaCart, a D2C e-commerce platform supporting **1,500+ products** through **~36 REST API endpoints** using Django REST Framework and PostgreSQL, covering authentication, product/category management, orders, reviews, role-based administration, and API validation.

PROJECTS

Bhasha Setu – AI-Powered Regional Content Studio

GitHub Repository

- Developed an AI-driven, **multilingual Content Studio** using **Amazon Bedrock (Nova Lite), Polly, and IndicTrans2, implementing 7 APIs** for image generation, video scripts, hashtags, voice/TTS, content calendars, draft management, and platform-specific content adaptation.
- Integrated **AWS EC2, API Gateway, and Unsplash API** to support AI-powered content generation, media integration, and localized content workflows across multiple Indian languages.

EVE Healthcare – Diagnostic Booking Platform

GitHub Repository

- Developed a **multi-tenant diagnostic booking backend** using Django REST Framework and PostgreSQL with JWT authentication, diagnostic centres, tests, appointment slots, availability management, and booking workflows.
- Containerized the application using **Docker and Docker Compose** and deployed it on **AWS** using ECR, ECS, task definitions, services, security groups, and Application Load Balancer.

SafeSphere – AI-Powered Disaster Preparedness Platform

Live Demo

- Developed a full-stack **disaster preparedness platform** using Django and Java script, featuring **40+ interactive learning modules**, real-time weather alerts, SOS emergency workflows, quizzes, virtual drills, and a **voice-enabled AI chatbot for disaster guidance**.
- Built multilingual preparedness workflows covering multiple disaster scenarios; tested with **1,000+ users**, with **94% reporting improved preparedness**.

RESEARCH

Empirical Evaluation of Energy and Carbon Costs across Programming Languages and ML Model Optimisations | *INCIP 2026*

- Presented research at INCIP 2026 evaluating the energy consumption and carbon costs of programming languages and ML model optimisation approaches.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL, HTML/CSS
Frameworks & Backend: Django, Django REST Framework, React.js, REST APIs, Microservices
Databases: PostgreSQL, MySQL, MongoDB, Database & Schema Design
Cloud & AI: AWS (Bedrock, S3, EC2, API Gateway, ECS, ECR, CloudWatch), LLMs, Prompt Engineering, RAG
Developer Tools: Git, GitHub, Postman, Docker, VS Code
Core CS: Data Structures & Algorithms, OOP, DBMS, ML, Distributed Systems
Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication

ACHIEVEMENTS

- Solved 350+ problems on LeetCode across Data Structures & Algorithms.
- Secured 1st Position at the National-Level Anveshna Hackathon for SafeSphere, an AI-powered disaster preparedness platform.
- Secured 3rd Position in the AI Innovation Challenge 2026 for SecureShield, a real-time fraud detection platform.

CERTIFICATIONS

NPTEL – Database Management Systems | Jul–Sep 2025
